

[Skin Doctors in Monterey Park CA](#)

Importance of Medical Skin Care

As we get older many of the anti-aging hormones and nutrients that our body needs to stay young and beautiful start to decline and may be blocked or decreased by toxicity and food sensitivities. The end result is that you start to feel tired and run down, you don't have the pep in your step you used to have, your waistband becomes substantially larger than it was when you were younger and your skin starts to sag, get dark age spots, and wrinkles. With these changes, external events such as your skin, hair and nails do not have the luster, elasticity, color, and tone they once had, and you start to experience many unwanted symptoms. We call this aging, and while some of this may be natural, a lot of it is due to chemicals in our environment such as in our air, water, and food.

You may even be having symptoms such as bloating, gas, nausea, heartburn, abdominal and GI pain and discomfort, hot flashes, low libido, vaginal dryness, brain fog, hair loss, and rashes... The Doctor will assess you for all of these unwanted symptoms, and after doing the proper labs, can make up a detailed treatment plan to help you become the youthful beautiful self you once were both internally and externally.

We carry a full line of skin care products and treatments for all different types of skin, body treatments for weight loss and body shaping, and wellness/nutritional plans for detoxification and over all well being. Developed locally at a lab here in California, we use Cosmeceutical Research Center's (CRC) full line of products. CRC is FDA registered and collaborates with chemists who have worked in the field of skincare for over 20 years to provide you the best quality in beauty skincare.

Medical Skin Care and Beauty Treatment Services

1. Anti-aging beauty, Body Physique, and Stress Consultation (1 hour) with labs: A one hour consultation with the Doctor, and hormonal assessment labs. The Doctor will go over every area in your life that can be causing you to age prematurely, both internal aging and external aging, as well as anything that is creating stress and or anxiety in your life. This will be a comprehensive assessment of your life and your anti-aging biological markers including: female hormones, DHEA, cortisol, and thyroid markers if needed.

Once the labs are back the Doctor can make up a very detailed treatment plan for you including our in house skin care products and treatments, Bio-identical hormones (if needed), nutrient IV's and injections, lipotropic injections (for weight loss through increased fat burning, nervous system toning, and liver detoxification), HCG and metabolic weight loss packages, ultrasonic liposuction treatments, organ balancing~ especially the thyroid and the adrenals, nutritional balancing~ diet and menu planning to maintain optimal weight , clean out any chemicals, stop food allergies, stop negative hormonal shifts, and beautify skin, hair and nails.

2. Skin Assessment and Body Physique Consultation (30 minutes) including Anti-Aging Treatment:

The Doctor will assess your skin type looking for hyper pigmentation, hypo pigmentation, tone, color, acne, rosacea, skin type, aging signs, and allergies. A comprehensive diagnosis, and an action treatment plan can be completed for you to include: skin care products, skin care treatments, diet assessment for beauty and body physique, including super foods, vitamins, minerals, and enzymes.

3. Following your Skin Assessment or Body Physique Assessment Consultation you may want to consider the following

treatments:

Skin Peels – We offer concentrated phytic acid, trichloroacetic acid (TCA), and organic skin peels. This is a form of resurfacing the skin. Skin resurfacing refers to the use of an agent or device to remove layers of skin, therefore allowing newer, refreshed skin to grow in its place. Our phytic acid treatments are gentle and effective and eliminate spots, evening skin tone and complexion, while tightening and firming the skin.

HCG and Metabolic Weight Loss/ Detox Plans- Whether it's 10 pounds or 100, we have effective weight loss programs for you to follow to reach your goals by re setting your metabolism. We also offer many supplements and programs to support a healthy lifestyle, and fight the toxicity that we encounter everyday from our environment .

Fat Reduction – We use low frequency ultrasound wave technology to instantly destroy fat cells. Your fat or cellulite literally melts away and is metabolized through the lymphatic system. This is a great semi-permanent, and effective last minute spot treatment for your trouble zones with out the pain and recovery time of a more invasive lipo surgery.

Skin Care Products- We carry a full line of skin care products for all different types of skin. Developed in it's own lab here in California, Masterpiece Anti-Aging Center uses Cosmeceutical Research Center's (CRC) full line of products. CRC is FDA registered and collaborates with chemists who have worked in the field of skincare for over 20 years to provide you the best quality in beauty skincare. We also carry Magnolia Orchid line of products which also offer the highest quality ingredients free of unnecessary preservatives and fillers. www.magnoliaorchid.com

What are cosmeceuticals?

They are a combination of a pharmaceutical, which will penetrate the skin, and a cosmetic, which treats and beautifies the surface of the skin.

CRC's formulators

President of CRC: Dr. Libaridian Ph.D, Technical director of Neutrogena International for 20 years and Vice President: Dr. Volynsky Ph.D, R&D chemist for Thibiant's International skin care line, used and promoted by Victoria Principal. CRC's Cosmoceuticals are used primarily by Dermatologists internationally and unsurpassed in quality and results.
